

The power sweeper.

WR 870 Honda

Equipped with a wire brush, green growth is ideally removed even in narrow passages.

WR 870 Honda PRO

Even long fiber material does not stick in the bristles, but can simply be swept aside.

No matter if less or much, powdery or firm, Snow removing is easy.

Even high masses can easily be moved with the powerful Honda motor.

HIGHLIGHT

The professional devices of the 870 series with the additional designation „PRO“ only differ in the height of the brush container. The higher the pot, the more sweeping debris can be swept.
